Asset Rotation deal of a 405 MW wind portfolio in the artnerships liability associated to these assets, were

1Q21 Highlights

Operational Results

EDPR had, by Mar-21, a portfolio of operating assets of 12.5 GW, with 9 years of avg. age, of which 11.7 GW fully consolidated and 711 MW equity consolidated (Spain, Portugal, US and Offshore). Since Mar-20, EDPR added a total of 1,870 MW of wind and solar capacity out of which 1,782 MW fully consolidated, specifically 652 MW in Europe, including the acquisition of the renewables business of Viesgo, 1,025 MW in North America and 105 MW in Brazil. Equity consolidated increased by 88 MW on the back of Viesgo acquisition and Seamade offshore project in Belgium, that entered in operation. During such period, EDPR successfully completed Sell-downs totalling 0.8 GW. All in all, EDPR YoY consolidated portfolio net variation was +1,233 MW.

As of Mar-21, EDPR had 2.9 GW of new capacity under construction, of which 2,226 MW of wind onshore, 404 MW of solar and 269 MW of equity participations in offshore projects.

In the period, EDPR produced 8.1 TWh of clean electricity (+5% YoY), avoiding 5mt of CO_2 emissions. The YoY evolution benefits from the capacity additions over the last 12 months along with a stable wind resource.

The average selling price declined -8% YoY driven by Spanish portfolio mix YoY average post Sell-down transactions, US hedging on the back of the one-off weather event and unfavourable forex translation.

Revenues to Net Profit

Revenues decreased to \leq 448m (-8% YoY), where the impact from capacity MW (- \leq 14m YoY; including Sell-down transactions), lower selling prices (- \leq 16m YoY; ex-Sell-down), forex translation and others (- \leq 18m YoY), were not offset by slightly higher wind resource (+ \leq 9m YoY).

Other operating income amounted to €16m (-€9m YoY). Operating Costs (Opex) totalled €179m (+4% YoY) given upfront costs to cope with expanded growth over the coming years. In comparable terms, Core Opex per avg. MW was -3% YoY, given O&M strategy and cost control.

EBITDA summed $\leq 269m$ (-21% YoY) and EBIT $\leq 126m$ (-35% YoY) given top line performance mainly affected by the US weather oneoff event, the negative impact in associated companies due to Offshore JV requirements needed to cope with under construction projects, and forex. Net Financial Expenses decreased to $\leq 55m$ (- $\leq 26m$ vs 1Q20) with YoY comparison affected by lower avg. cost of debt in the period (3.3% vs 3.8% in 1Q20).

At the bottom line, Net Profit summed €38m (-39% YoY) partially offset by lower financials and positive tax offsets. Non-controlling interests in the period totalled €32m, decreasing by €10m YoY as a result of top line performance.

Cash Flow & Net Debt

As of Mar-21, Net Debt totalled €4,648m (+€1,205m vs Dec-20) reflecting the Treasury optimization during Q1 given Capital increase cash-in in April.

Institutional Partnership Liabilities summed €911m (-€233m vs Dec-20), reflecting benefits captured by the projects along with the reclassification to asset held for sale of the Asset Rotation transaction announced in Apr-21.

Comments:

- CO2 avoided: YoY variation due to increase in energy generated (+5% YoY) offset by lower emission factors (-7% YoY).

- CO2 emissions: Impacted by lower business travel & commuting emissions due to Covid-19 (scope 3), partially offset by +10% YoY installed capacity (scope 1 and 2).

- Non-hazardous waste: Variation mainly due to impact of metals from blades in 1Q20 data.

- Hazardous waste: Variation mainly due to impact of oil related waste in 1Q20 data.

(1) CO2 avoided calculated as energy generation * CO2 eq. emission factors of each country and state within the US. Please note that these factors vary in accordance with the country/state's energy mix; (2) CO2 emissions for 1Q20 are estimated;

(3) Waste data for 1Q20 is estimated; Refers to operation data only;

(4) EDPR defines significant spills and fires as any spill affecting water bodies/courses, protected soils or soils of interest because of its natural value, or fire affecting protected areas and/or species (according to local protection laws), derived from the operation & maintenance activities in the facilities;

(5) 1Q20 data is estimated.

€35m in Social & A2E investmer

Comments:

- Training: YoY variations due to more global online courses of shorter duration and mandatory Compliance courses in 1Q21.

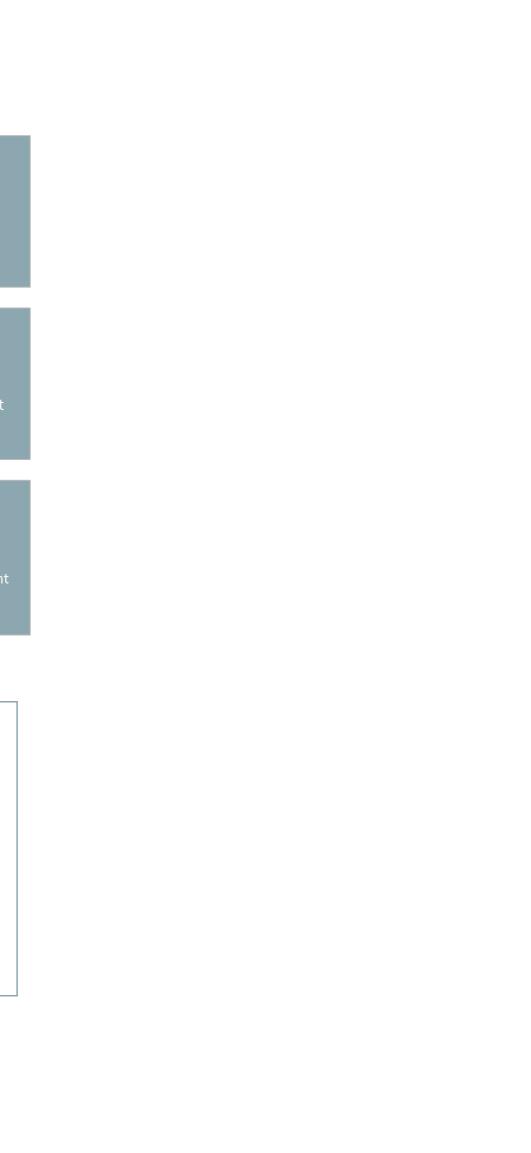

- Frequency rate: YoY variation impacted by increase in worked hours (+147% YoY), mainly due to 115% increase in capacity under construction.

- Severity rate: 1Q21 - Adjusted severity rate (excluding the lost days from 2020 accidents); Non-adjusted severity rate: 127; 72% of lost workdays in 2021 are a result of 7 injuries that happened in late 2020.

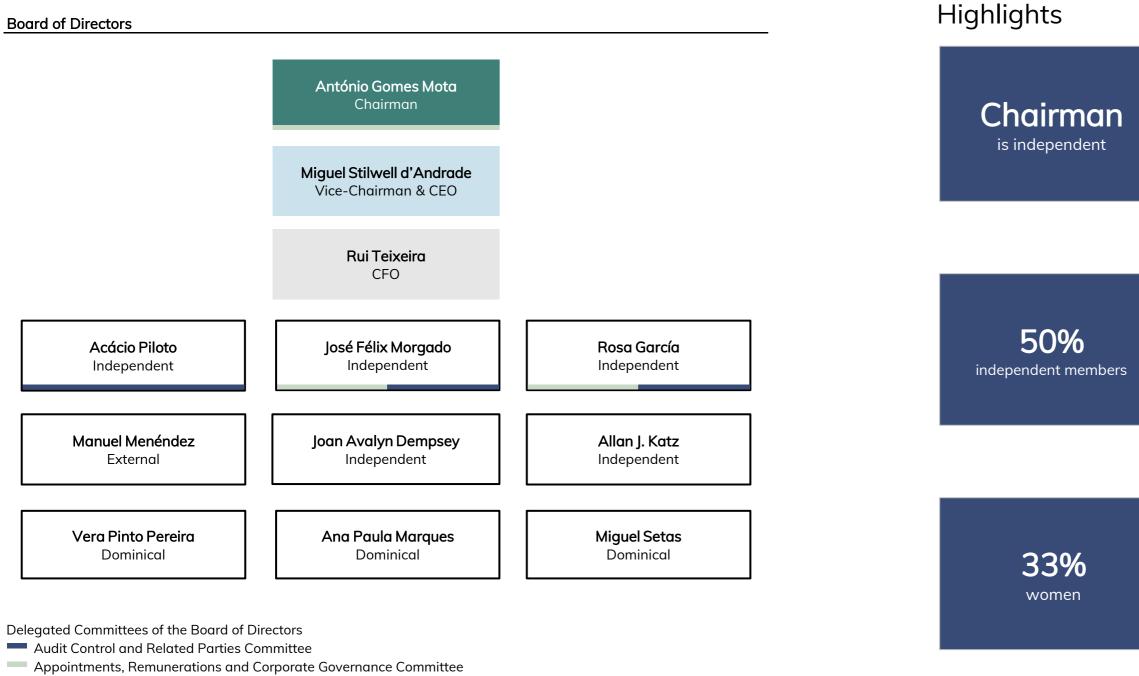

- H&S inspections to suppliers: YoY increase due to an ongoing contractor evaluations program in North America that started at the end of 1Q20.

- Investment in Access to Energy: Cumulative investment: SolarWorks! in Mozambique (€2.2 million) and Rensource in Nigeria (\$2.9 million).

(1) Turnover calculated as: departures/headcount; 1Q20 data excludes transfers to JV with Engie;
 (2) Includes employees and contractors data, excludes commuting accidents, and excludes 1Q20 UK data;
 (3) Frequency Rate calculated as [# of Work-related injuries with lost workdays/Hours worked * 1,000,000];
 (4) Severity Rate calculated as [# of Lost workdays due to work-related injuries/Hours worked * 1,000,000].

Governance Performance

Comments:

On April 12, 2021, in EDPR's General Shareholders' Meeting and the BoD meeting held afterwards, the proposals for re-election and appointments of directors of the Company were approved:

António Gomes Mota was appointed as Chairman and Independent Director;

Miguel Stilwell d'Andrade and Rui Teixeira were re-elected as Executive Directors and CEO and CFO, respectively;

Acácio Piloto, Allan J. Katz and Joan Avalyn Dempsey were re-elected as Independent Directors;

Manuel Menéndez was re-elected as External Director;

Vera Pinto Pereira and Ana Paula Marques were re-elected as Dominical Directors;

Miguel Setas was appointed as Dominical Director.

EDPR is committed to ESG best practices and focused on the continuous improvement of its corporate governance, and the resolutions approved on April 12, 2021 contribute to a more agile, independent and diverse corporate governance structure.

Annex

Remuneration Frameworks

Country	Short Description	Country	
	 Wind farms commissioned before 2006 are subject to a FIT whose value is correlated with production and indexed with CPI. Initial tenure was the soonest of 15y (or until 2020) or 33 GWh/MW but it was increased 7y (tariff extension) with a cap and floor scheme in exchange of annual payments between 2013-20 ENEOP: price defined in an international competitive tender and set for 15y (or the first 33 GWh/MW) + 7y (extension cap/floor system: €74-€98/MWh). Tariff for first year established at c.€74/MWh and CPI monthly update for following years & VENTINI/ESTE: price defined in an international competitive. 	Poland	 Electricity price can be stablis Wind farms before 2018 are straded in the market. Electricity obligations Wind farms awarded in 2018
Portugal	 monthly update for following years & VENTINVESTE: price defined in an international competitive tender and set for 20y (or the first 44 GWh/MW) Wind farms under the new regime (COD after 2006) are subject to a FIT for the soonest of 20y from COD of 44 GWh/MW. Tariff is also indexed wit CPI Solar PV projects awarded in the latest auction (Jul-19) are subject to a flat FIT during 15y. Projects will bear the cost of imbalances 	France	 The majority of existing wind First 10y: €82/MWh; Years 2 @3,600 hours; indexed Wind farms under the CR 202 fee plus a management prem Auctions (20y CfD)
	 Wind energy receives pool price and a premium per MW in order to achieve a target return defined by regulation. Already published for 2020-22 period RDL 17/2019 has set the target return (TRF) @7.398% for WF's prior to 2013 and @7.09% for new installations until 2031 	Belgium	 Mkt price + green certificate (Option to negotiate long-term
Spain	 Premium calculation is based on standard assets (standard load factor, production and costs) Since 2016, all the new renewable capacity is allocated through competitive auctions First auction of the new REER scheme celebrated in Jan-21, awarding 12y CfDs 	Italy	 Wind farms in operation prior 15y of operation. Wind farms commissioned fro to a 20y floor CfD scheme Wind farms awarded in 2019
B razil	 Old installed capacity under a feed-in tariff program ("PROINFA") Since 2008, competitive auctions awarding 20y PPAs Sales can be agreed under PPAs 	Hungary	Solar PV assets benefit from scheme
USA	 Sales can be agreed under PPAs (up to 20y), Hedges or Merchant prices Green Certificates (Renewable Energy Credits, REC) subject to each state regulation Tax Incentives: PTC collected for 10y since COD (\$26/MWh in 2021) & Wind farms beginning construction in 2009 and 2010 could opt for 30% cash grant in lieu of PTC Tax Incentives: ITC for solar projects based upon its capex. This equates to 26% for projects that start construction before 2022 and 22% for projects starting construction in 2023, if COD is at least in 2025 	Romania	 Wind assets (installed until 20 completing 15y. 1 out of the 2 assets receive 6 GC/MWh for until Dec-30. GC are tradable Wind assets (installed in 201 completing 15y The GCs issued starting in Ap
(**) Canada	 Feed-in Tariff (Ontario). Duration: 20y Renewable Energy Support Agreement (Alberta) 		may be traded until Mar-32
Mexico	 Technological-neutral auctions (opened to all technologies) in which bidders offer a global package price for the 3 different products (capacity, electricity generation and green certificates) EDPR project: bilateral Electricity Supply Agreement under self-supply regime for a 25y period 	Greece	• 20y non-indexed CfD, allocat
	 UK: 15y CPI indexed. CfD allocated by tender @£57.5/MWh (2012 tariff-based) France: 20y indexed feed-in tariff Belgium: 17y CfD, CPI indexed. 	Colombia	 Colombian wind farms have a auction. Contracts are signed Additionally, Colombian wind of having part of its capacity

Short Description

ablished through bilateral contracts

are subject to a GC scheme. Wind receive 1 GC/MWh during 15y that can be stricity suppliers have a substitution fee for non-compliance with GC

2018,/2019/2020 auctions are subject to a two-side CfD with a tenure of 15y

vind farms receive Feed-in tariff for 15y: ars 11-15: depending on load factor €82/MWh @2,400 hours to €28/MWh

2016 scheme receive 15y CfD which strike price value similar to existing FIT premium

ate (GC) scheme. The min-price for GC is set @€65 term PPAs

prior to 2012YE are under a feed-in-premium scheme applicable for the first

d from 2013 onwards awarded in competitive auctions until 2017 are subject

2019-20 auctions have 20y 2-side CfD scheme

om 15y CfD indexed with CPI-1% awarded through auctions under METAR

til 2013) receive 2 GC/MWh until 2017 and 1 GC/MWh after 2017 until he 2 GC earned until Mar-17 can only be sold from Jan-18 until Dec-25. Solar n for 15y. 2 out of the 6 GC earned until Dec-20 can only be sold after Jan-21 able on market under a cap and floor system (cap €35/floor €29.4) 2013) receive 1.5 GC/MWh until 2017 and after 0.75 GC/MWh until

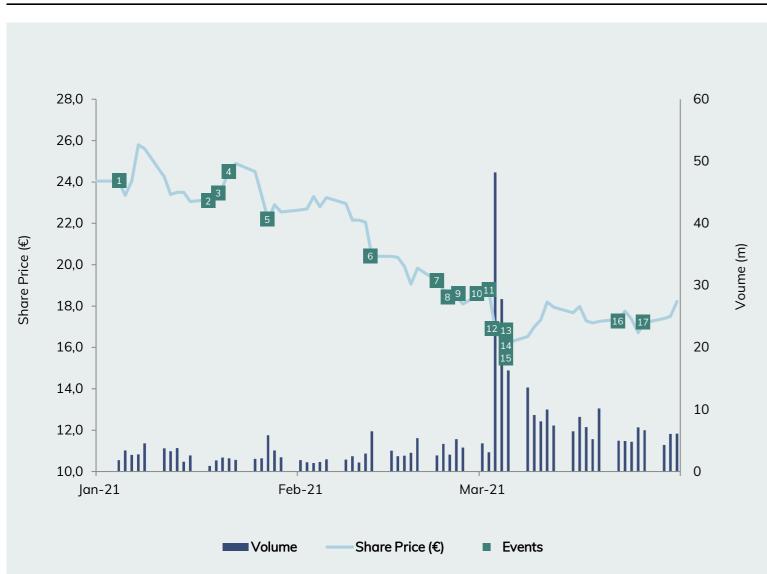

n Apr-17 and the GCs postponed to trading from Jul-13 will remain valid and 32

ocated through tenders

ave been awarded 15y long-term contracts though competitive pay-as-bid ned with several Colombian distribution counties

vind farms secured reliability charge contract, a monthly payment in exchange city available when the system is under tight supply conditions
