

South Branch Wind Farm Community Liaison Committee

By South Dundas Windfarm Limited Partnership

The South Branch Wind Farm (Project) is a 30 MW wind farm that will consist of 10 Siemens SWT-3.0-113 wind turbines. The project is located near the town of Brinston, Ontario in the Municipality of South Dundas in the United Counties of Stormont, Dundas, and Glengarry. The Project received a Renewable Energy Approval (REA) from the Ministry of the Environment on July 11, 2013. As part of the REA, the South Branch Wind Farm must establish a Community Liaison Committee (CLC,) primarily for neighbours within one (1) kilometer of the project, but also open to anyone with an interest in the construction, operation, maintenance, or the decommissioning of the Project.

The CLC is intended to be a forum to discuss Project updates, milestones, concerns, issue resolution, and mitigation. CLC members will be asked to communicate with friends and neighbours to provide updates and seek feedback regarding the Project. All meetings will be open to the general public for observation.

If you are interested in becoming a member of the CLC, please provide your contact information below and a short summary of your interest in the Project by November 1, 2013. As per the conditions outlined in the REA, the CLC will meet at a minimum four (4) times over the next two (2) years. The first meeting will occur in mid-November, pending availability of the CLC members. The meeting schedule will be communicated to those interested in becoming a member and posted on the Project website found below.

Project Contact Information:

For further information regarding the project or to become a member of the CLC please contact the Project Team using one of the methods below.
