

INDIANA: Riverstart

Riverstart Solar Park will be located approximately 80 miles northeast of Indianapolis in eastern Indiana. Located entirely within Randolph County, the solar park will complement the area's agricultural resources with a stable, drought-resistant cash crop in the form of landowner lease payments.

200 MW

ANTICIPATED COD
2022

Riverstart Solar Park will produce enough electricity to power more than **36,000** Indiana homes.¹

Economic Benefits

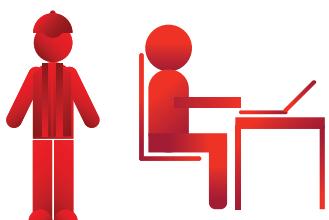

Riverstart represents a capital investment of approximately **\$180 million**.²

Millions of dollars in payments to local governments through the life of the project.

Millions of dollars will be paid to local landowners through the life of the project.

Creation of hundreds of full-time equivalent jobs during construction and several permanent jobs during the life of the project.

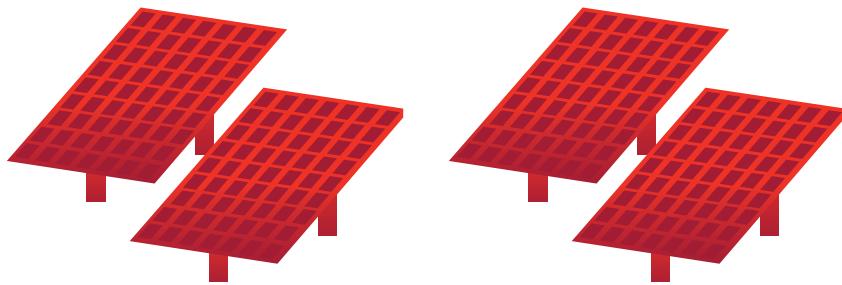

Millions of dollars will be spent within 50 miles of the solar park through the life of the project.³

Hoosier Energy will purchase energy from Riverstart.⁴

Panel Technology

Riverstart Solar Park will consist of thousands of solar photovoltaic panels.

About Us

EDP Renewables North America LLC (EDPR NA) and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 52 wind farms, eight solar parks, and seven regional offices across North America, EDPR NA has developed more than 7,300 megawatts (MW) and operates more than 7,000 MW of renewable energy projects. With more than 700 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is owned by EDP Renováveis, S.A. (EDP Renewables or EDPR), a global leader in the renewable energy sector and the world's fourth-largest wind energy producer. With a sound development pipeline, first-class assets, and market-leading operating capacity, EDPR has undergone exceptional development in recent years and is currently present in 14 markets (Belgium, Brazil, Canada, Colombia, France, Greece, Italy, Mexico, Poland, Portugal, Romania, Spain, the United Kingdom, and the United States). Energias de Portugal, S.A. ("EDP"), the principal shareholder of EDPR, is a global energy company and a leader in value creation, innovation, and sustainability. EDP has been included in the Dow Jones Sustainability Index for 13 consecutive years.

¹Power generation calculated using a 25% capacity factor for solar based on [February 2020 EIA average solar capacity factor](#). Household consumption based on the [2018 EIA Household Data monthly average consumption by state](#).

²Assumes the average cost of an installed solar photovoltaic system is \$0.90/watt for a utility-scale project. Based on [2019 SEIA U.S. Solar Market Insight](#).

³Includes vendor spending, property taxes, landowner payments, and wages from site jobs. These numbers are presented for example purposes only, and actual payments may vary.

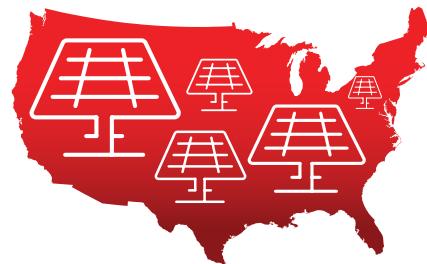

⁴Riverstart Solar Park Oftakers: Hoosier Energy (PPA).

⁵Assumes 0.58 gallons of water consumed per kWh of conventional electricity from [Lee, Han, & Elgowainy, 2016](#).

⁶Based on [2019 SEIA U.S. Solar Market Insight](#).

Riverstart Solar Park will save more than **355 million** gallons of water each year.⁵

POWERING THE USA

In 2019, solar represented nearly 40 percent of new electricity generating capacity in the U.S.⁶

Riverstart Solar Park will provide energy security and help diversify supply.
