

Lost Lakes Wind Farm

Dickinson County, Iowa

Lost Lakes Wind Farm is located approximately three miles west of the town of Milford in northwest Iowa on agricultural and pasture land in Dickinson County. The land is mainly used to grow corn and soybeans, and the Little Sioux River runs along the east side of the project area. Lost Lakes Wind Farm includes farmland in the Lakeville, Okoboji, Excelsior, and West Port townships.

101 MW

ONLINE SINCE 2009

Lost Lakes Wind Farm's generation is equivalent to the consumption of more than **28,000 Iowa homes**.¹

Lost Lakes saves more than **178 million** gallons of water each year and prevents the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

CAPITAL INVESTMENT³
\$221+ million

\$6.2 million+

PERMANENT JOBS⁶
14 jobs created

CONSTRUCTION JOBS⁶
114 jobs created

Lost Lakes Wind Farm consists of 61 Vestas V82 1.65 MW wind turbines.

Tennessee Valley Authority purchases energy from Lost Lakes.⁷

Lost Lakes provides national energy security and helps diversify domestic supply.

“Wind is the top renewable energy source in the U.S., supplying 8.4 percent of all utility-scale electricity.⁸”

About Us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 58 wind farms, eight solar parks, and seven regional offices across North America, EDPR NA has developed more than 8,300 megawatts (MW) and operates more than 8,000 MW of onshore utility-scale renewable energy projects. With more than 800 employees, EDPR NA’s highly qualified team has a proven capacity to execute projects across the continent.

EDP Renewables (Euronext: EDPR), is a global leader in the renewable energy sector and the world’s fourth-largest renewable energy producer. With a sound development pipeline, first class assets, and market-leading operating capacity, EDPR has undergone exceptional development in recent years and is currently present in 17 international markets (Belgium, Brazil, Canada, Chile, Colombia, France, Greece, Hungary, Italy, Mexico, Poland, Portugal, Romania, Spain, the United Kingdom, the United States, and Vietnam). Energias de Portugal, S.A. (EDP), the principal shareholder of EDPR, is a global energy company and a leader in value creation, innovation, and sustainability. EDP has been included in the Dow Jones Sustainability Index for 13 consecutive years.

¹Power generation calculated using a 35% capacity factor for wind based on 2019 AWEA Wind Powers America Annual Report. Household consumption based on the 2018 EIA Household Data monthly average consumption by state.

²Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowainy, 2016.

³Assumes the average cost of an installed wind farm is \$2.2 million/MW for projects built before 2012. Based on U.S. DOE 2015 Wind Technologies Market Report.

⁴Cumulative local government payments from 2010 through 2020.

⁵Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.

⁶Includes vendor spending, property taxes, landowner payments, and wages from site jobs. These numbers are presented for example purposes only, and actual payments may vary.

⁷Lost Lakes Wind Farm Offtakers: Tennessee Valley Authority (PPA).

⁸Based on U.S. Energy Information Administration. March 2021.
