

Number Nine Wind Farm

Aroostook County, Maine

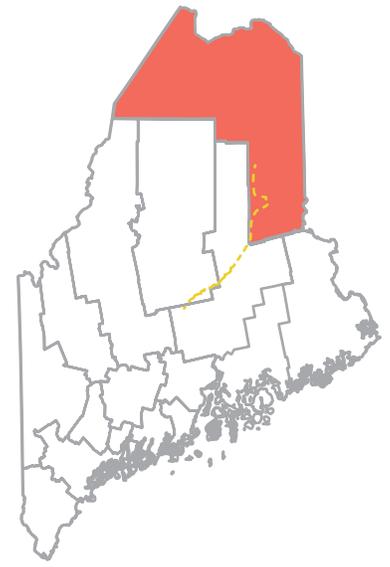

Number Nine Wind Farm will be located in remote Aroostook County in commercial timberland and will provide stable income to landowners and tax revenue to the county. The project will connect to the Maine power grid in Pittsfield via a new transmission line which could be used to reduce long-term energy costs and increase reliability for northern Mainers.

350 MW

 Number Nine Wind Farm's generation will be equivalent to the consumption of more than **156,000 Maine homes**.¹

 Number Nine will save more than **622 million** gallons of water each year and prevents the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

 CAPITAL INVESTMENT³
\$1.1 billion

 **\$228 million**
WILL BE PAID TO
LOCAL GOVERNMENTS

 **\$1 million annually**
PAID TO LANDOWNERS

 **\$30 million+**
SPENT LOCALLY⁴

 PERMANENT JOBS⁵
Approximately 40
jobs will be created

 CONSTRUCTION JOBS⁵
Up to 1,200 jobs
will be created

NUMBER NINE
WIND FARM®

All economic data reflects the estimated amount throughout the life of the project.

Number Nine Wind Farm will consist of approximately 70 state-of-the-art wind turbines.

The 162-mile, 345 kilovolt transmission line could open renewable energy development opportunities in Aroostook County.

Number Nine provides national energy security and helps diversify domestic supply.

Wind is the top renewable energy source in the U.S., supplying 8.4 percent of all electricity.⁶

About Us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 58 wind farms, eight solar parks, and seven regional offices across North America, EDPR NA has developed more than 8,300 megawatts (MW) and operates more than 8,000 MW of onshore utility-scale renewable energy projects. With more than 800 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDP Renewables (Euronext: EDPR), is a global leader in the renewable energy sector and the world's fourth-largest renewable energy producer. With a sound development pipeline, first class assets, and market-leading operating capacity, EDPR has undergone exceptional development in recent years and is currently present in 17 international markets (Belgium, Brazil, Canada, Chile, Colombia, France, Greece, Hungary, Italy, Mexico, Poland, Portugal, Romania, Spain, the United Kingdom, the United States, and Vietnam). Energias de Portugal, S.A. (EDP), the principal shareholder of EDPR, is a global energy company and a leader in value creation, innovation, and sustainability. EDP has been included in the Dow Jones Sustainability Index for 13 consecutive years.

For more information, visit www.edpr.com/north-america.

¹Power generation calculated using a 35% capacity factor for wind based on 2019 AWEA Wind Powers America Annual Report. Household consumption based on the 2018 EIA Household Data monthly average consumption by state.

²Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowainy, 2016.

³Projected capital expenditure for wind farm and transmission line construction and operation based on "The Economic Benefits of the Number Nine Wind Project to the State and Local Economy of Maine" prepared by Ryan D. Wallace PhD, May 2020.

⁴Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.

⁵Includes vendor spending, property taxes, landowner payments, and wages from site jobs. These numbers are presented for example purposes only, and actual payments may vary.

⁶Based on U.S. Energy Information Administration. March 2021.
