

Rail Splitter Wind Farm

Tazewell & Logan Counties, Illinois

Rail Splitter Wind Farm is located in Tazewell and Logan Counties, north of the town of Lincoln. The wind farm is near the towns of Delavan, Hopedale, and Emden on a glacial moraine known as Union Ridge.

100.5 MW
ONLINE SINCE **2009**

Rail Splitter Wind Farm's generation will be equivalent to the average consumption of more than **34,000 Illinois homes**.¹

Rail Splitter will save more than **178 million gallons** of water each year and prevents the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

CAPITAL INVESTMENT³
\$221 million

\$9.2 million+
PAID TO LOCAL GOVERNMENTS⁴

\$12.5 million+
PAID TO LANDOWNERS

\$23.3 million
SPENT LOCALLY⁵

PERMANENT JOBS⁶
11 jobs created

CONSTRUCTION JOBS⁶
73 jobs created

Rail Splitter Wind Farm consists of **67 GE s1e 1.5 MW wind turbines.**

Hoosier Energy purchases energy from Rail Splitter.⁷

Rail Splitter will **provide to the national energy security** for the state of Illinois and the United States, helping diversify domestic supply.

Wind is the **largest source** of renewable electricity generation in the United States, **providing 13%** of the country's electricity.⁸

About Us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 58 wind farms, nine solar parks, and eight regional offices across North America, EDPR NA has developed more than 8,800 megawatts (MW) and operates more than 8,200 MW of onshore utility-scale renewable energy projects. With more than 950 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDPR), a global leader in the renewable energy sector. EDPR is the fourth largest renewable energy producer worldwide with a presence in 28 markets across Europe, North America, South America and Asia Pacific. EDPR has a robust development portfolio with first-class assets and a market-leading operational capability in renewables. These include wind onshore, utility scale and distributed solar, wind offshore (through its 50/50 JV - OW) and technologies complementary to renewables such as batteries and green hydrogen.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. EDP - EDPR's main shareholder - has been listed on the Dow Jones Index for 14 consecutive years, recently being named the most sustainable electricity company on the Index.

¹Power generation calculated using a 35% capacity factor for wind based on 2019 AWEA Wind Powers America Annual Report. Household consumption based on the 2018 EIA Household Data monthly average consumption by state.

²Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowainy, 2016.

³Assumes the average cost of an installed wind farm is \$2.2 million/MW for projects built before 2012. Based on U.S. DOE 2015 Wind Technologies Market Report.

⁴Cumulative local government payments from 2010 through 2020.

⁵Includes vendor spending, property taxes, landowner payments, and wages from site jobs. These numbers are presented for example purposes only, and actual payments may vary.

⁶Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.

⁷Rail Splitter Wind Farm Offtakers: Hoosier Energy (PPA). Additional oftakers privately purchase energy from Rail Splitter Wind Farm.

⁸American Clean Power Association, 2022.
