

About Wind

U.S. Wind Energy Facts*

Wind power capacity totals **146 GW**, making it the **fourth-largest source of electricity** generation capacity in the country.

Wind is America's largest source of renewable energy.

Wind power capacity totals

146 GW nationwide

Wind energy provides a quarter of the electricity produced in eight states

334M

CO2 emissions avoided

Equivalent to taking 73 million cars off the road

10.3%
of the country's electricity

Largest source of renewable energy in the U.S.

Powers the equivalent of

46 million homes

Supports more than

126,000

Americans across all 50 states

80%

above the nation average

The wind industry employs America's veterans

Turbine Technician

Second fastest growing job

Need increasing by 44% over the next decade

\$140B

spent in the last decade

Wind is a major economic contributor

\$2B

paid out locally

In state and local taxes and land-lease payments last year

\$13B

invested in 2022 alone

Investment in new projects nationwide

Wind Project Overview

Wind farms are compatible with a wide array of other land uses.

Only **2 to 5 percent** of the land is needed for the turbines themselves. The vast majority of land used to host turbines can continue to be used for its original purposes, such as ranching, farming, wildlife habitat, and recreation.

The clean, renewable energy produced by our wind farms provides power to hundreds of thousands of homes and businesses.

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms, solar parks, and energy storage systems throughout North America. Headquartered in Houston, Texas, with 58 wind farms, 10 solar parks, and eight regional offices across North America, EDPR NA has developed more than 9,600 megawatts (MW) and operates more than 8,400 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDP), a global leader in the renewable energy sector. EDP is the world's fourth-largest producer of wind and solar energy and is present in 28 markets in Europe, North America, South America, and Asia-Pacific. With headquarters in Madrid and leading regional offices in Houston, São Paulo, and Singapore, EDP has a sound development portfolio of top-level assets and market-leading operating capacity in renewable energies. Particularly worthy of note are onshore wind, distributed and utility-scale solar, offshore wind (OW – through a 50/50 joint venture), and technologies to complement renewables such as storage and green hydrogen.

EDPR's employee-centered policies have received recognition such as Top Workplace 2023 in the USA, Top Employer 2023 in Europe (Spain, Italy, France, Romania, Greece, Portugal, and Poland) Colombia, and Brazil, and are also included in the Bloomberg Gender-Equality Index.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. Besides its strong presence in renewables (with EDPR and hydro operations), EDP has an integrated utility presence in Portugal, Spain, and Brazil including electricity networks, client solutions, and energy management. EDP – EDPR's main shareholder – has been listed on the Dow Jones Sustainability Index for 14 consecutive years, recently being named the most sustainable electricity company on the Index.
