Important Information

- In June-21, EDPR concluded an Asset Rotation deal regarding the 68% stake of a 405 MW wind portfolio in the US.

1H21 Highlights

Operational Results

EDPR had, by Jun-21, a portfolio of operating assets of 12.6 GW, with 9 years of avg. age, of which 11.7 GW fully consolidated and 841 MW equity consolidated (Spain, Portugal, US and Offshore). Since Dec-20, EDPR added a total of 691 MW of wind and solar capacity out of which 648 MW fully consolidated, specifically 83 MW in Europe, 537 MW in North America, and 28 MW in APAC, namely in Vietnam. Equity consolidated increased by 43 MW on the back of the Seamade offshore project in Belgium, that entered in operation during the first quarter of the year.

Pursuing its Asset rotation strategy, EDPR successfully concluded the sale of a 68% equity stake in a 405 MW operational wind portfolio in the US (275 MW net). All in all, EDPR YoY consolidated portfolio net variation was +415 MW.

As of Jun-21, EDPR had 2.9 GW of new capacity under construction, of which 2,195 MW of wind onshore, 421 MW of solar and 269 MW of equity participations in offshore projects.

In the period, EDPR produced 15.3 TWh of clean electricity (+5% YoY), avoiding 10mt of CO₂ emissions. The YoY evolution benefits from the capacity additions over the last 12 months along with a stable wind resource.

The average selling price declined -7% YoY driven by Spanish portfolio mix YoY average post Sell-down transactions, US hedging on the back of the one-off weather event in the 1Q and unfavourable forex translation.

Revenues to Net Profit

Revenues decreased to €856m (-6% YoY; -€57m), where the impact from Sell-down (-€69m YoY), lower average selling price (-€22m YoY; ex-Sell-down), mostly driven by Spain and US, unfavourable forex translation and others (-€38m YoY), were not offset by additional capacity MW (+€61m YoY) and wind resource (+€11m YoY)

Other operating income amounted to €141m (-€53m YoY). Operating Costs (Opex) totalled €331m (+7% YoY) given upfront costs to cope with expanded growth over the coming years. In comparable terms, Core Opex per avg. MW adjusted by Sell-down, offshore costs, service fees, one-offs and forex, was -3% YoY, given O&M strategy and cost control.

EBITDA summed €654m (-13% YoY adjusted by forex) and EBIT €364m (-€137m YoY) given top line performance mainly affected by the US weather one-off event in the 1Q, lower capital gains YoY and forex. Net Financial Expenses decreased to €111m (-€52m vs 1H20) with YoY comparison affected by lower avg. cost of debt in the period (-0.6pp YoY).

At the bottom line, Net Profit summed €142m (-44% YoY) partially offset by lower financials and D&A. Non-controlling interests in the period totalled €64m, decreasing by €12m YoY as a result of top line performance.

Cash Flow & Net Debt

As of Jun-21, Net Debt totalled €3,563m (+€120m vs Dec-20) reflecting the investment strategy offset by the Capital increase received in April.

Institutional Partnership Liabilities summed €858m (-€285m vs Dec-20), reflecting benefits captured by the projects and the deconsolidation of asset sold in the period.

Comments:

- CO₂ avoided: YoY variation due to increase in energy generated (+5% YoY) offset by lower emission factors (-6% YoY).

- CO₂ emissions: Impacted by +10% YoY installed capacity (scope 1 and 2), partially offset by lower business travel & commuting emissions due to Covid-19 (scope 3).

- Waste: 1H21 data in line with previous years (1H20 data impacted by Covid-19)

(1) CO₂ avoided calculated as energy generation * CO₂ eq. emission factors of each country and state within the US. Please note that these factors vary in accordance with the country/state's energy mix;

(2) Refers to operation data only;

(3) EDPR defines significant spills and fires as any spill affecting water bodies/courses, protected soils or soils of interest because of its natural value, or fire affecting protected areas and/or species (according to local protection laws), derived from the operation & maintenance activities in the facilities;

Comments:

- Training: YoY variations due to increase in global online courses of shorter duration at EDPR and EDP level, and increased participation in language courses.
- Fatal work-related injuries: EDPR is currently analysing the causes and improvement opportunities related to this incident.
- Frequency rate: YoY variation impacted by increase in worked hours (+115% YoY), mainly due to increase in capacity installed and capacity under construction.
- Severity rate: 1H21 - Adjusted severity rate (excluding lost workdays derived from 2020 accidents);
Non-adjusted severity rate: 113; 49% of lost workdays in 2021 are a result of injuries that happened in late 2020.
- H&S inspections to suppliers: YoY increase mainly due to an ongoing contractor evaluations program in North America.
- Investment in Access to Energy: Cumulative investment: SolarWorks! in Mozambique (€2.2 million) and Rensource in Nigeria (\$2.9 million).
