

OHIO

EDP Renewables is a renewable energy leader in Ohio. The company's footprint in the state includes the two phases of the Timber Road Wind Farm, Hog Creek Wind Project, and Amazon Wind Farm Ohio-Timber Road.

391 MW
OPERATING IN OHIO

EDPR'S OHIO ENERGY PROJECTS:

-  Generate electricity equivalent to the consumption of more than **109,000 Ohio homes**.¹
-  Save more than **695 million gallons of water each year** and prevent the air pollution that causes smog, acid rain, and climate change.²
-  Are compatible with other land uses.
-  Strengthen domestic energy security and help diversify supply.

Economic Benefits OF EDPR'S OHIO PROJECTS

CAPITAL INVESTMENT³
\$662 million+

\$34 million+
WILL BE PAID TO LOCAL GOVERNMENTS⁴

\$34.3 million+
PAID TO LANDOWNERS

\$113.5 million+
SPENT WITHIN OHIO⁵

PERMANENT JOBS⁶
30 jobs created

CONSTRUCTION JOBS⁶
266 jobs created

Renewable energy is the future of U.S. energy.

Wind supplies 8.4 percent of all U.S. electricity,⁷ and solar represents 43 percent of new generating capacity.⁸

WIND, SOLAR, & STORAGE Ohio⁹

Total Operating Capacity

\$11.2 million

Annual Lease Payments to Landowners
\$8.9 million

About Us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 58 wind farms, nine solar parks, and eight regional offices across North America, EDPR NA has developed more than 8,800 megawatts (MW) and operates more than 8,200 MW of onshore utility-scale renewable energy projects. With more than 950 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDP), a global leader in the renewable energy sector. EDP is the fourth largest renewable energy producer worldwide with a presence in 28 markets across Europe, North America, South America and Asia Pacific. EDP has a robust development portfolio with first-class assets and a market-leading operational capability in renewables. These include wind onshore, utility scale and distributed solar, wind offshore (through its 50/50 JV - OW) and technologies complementary to renewables such as batteries and green hydrogen.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. EDP - EDPR's main shareholder - has been listed on the Dow Jones Index for 14 consecutive years, recently being named the most sustainable electricity company on the Index.

¹ Power generation calculated using a 35% capacity factor for wind. Household consumption based on the 2018 EIA Household Data monthly average consumption by state.

² Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowny, 2016.

³ Assumes the average cost of an installed wind farm is \$1.4 million/MW for projects built after 2018, \$1.6 million/MW for projects built in 2017, \$1.7 million/MW for projects built between 2012 and 2016, and \$2.2 million/MW for projects built before 2012. Based on U.S. DOE 2018 Wind Technologies Market Report, U.S. DOE 2017 Wind Technologies Market Report, and U.S. DOE 2015 Wind Technologies Market Report.

⁴ Cumulative local government payments from 2010 through 2020.

⁵ Includes vendor spending, property taxes, landowner payments, and wages from site jobs. These numbers are presented for example purposes only, and actual payments may vary.

⁶ Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.

⁷ Based on U.S. Energy Information Administration, March 2021.

⁸ Based on 2020 SEIA U.S. Solar Market Insight.

⁹ Statistics provided by American Clean Power State Fact Sheets, October 2021.
