

Marathon Wind Farm

Marathon County, Wisconsin

Marathon Wind Farm would be located in western Marathon County in Brighton and Eau Pleine Townships. The wind farm would have minimal impacts on current land use and would strengthen the local economy of Marathon County through landowner payments, job creation, and payments to the local government.

98 MW

ESTIMATED COMMERCIAL
OPERATION DATE **2026**

Marathon Wind Farm's generation would be equivalent to the consumption of more than **36,000 Wisconsin homes**.¹

Marathon Wind Farm would save more than **174 million gallons** of water each year and would prevent the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

CAPITAL INVESTMENT³
\$137.2 million

\$12 million
WOULD BE PAID TO LOCAL GOVERNMENTS

\$35+ million
WOULD BE PAID TO LANDOWNERS

\$9.8+ million
WOULD BE SPENT LOCALLY⁴

PERMANENT JOBS⁵
7-10 jobs would be created

CONSTRUCTION JOBS⁵
100+ jobs would be created

About us

EDP Renewables North America LLC (EDPR NA), EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms, solar parks, and energy storage systems throughout North America. Headquartered in Houston, Texas, with 58 wind farms, 10 solar parks, and eight regional offices across North America, EDPR NA has developed more than 9,600 megawatts (MW) and operates more than 8,400 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDPR), a global leader in the renewable energy sector. EDPR is the world's fourth-largest producer of wind and solar energy and is present in 28 markets in Europe, North America, South America, and Asia-Pacific. With headquarters in Madrid and leading regional offices in Houston, São Paulo, and Singapore, EDPR has a sound development portfolio of top-level assets and market-leading operating capacity in renewable energies. Particularly worthy of note are onshore wind, distributed and utility-scale solar, offshore wind (OW - through a 50/50 joint venture), and technologies to complement renewables such as storage and green hydrogen.

EDPR's employee-centered policies have received recognition such as Top Workplaces 2023 in the USA, Top Employer 2023 in Europe (Spain, Italy, France, Romania, Greece, Portugal, and Poland), Colombia, and Brazil, and are also included in the Bloomberg Gender-Equality Index.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. Besides its strong presence in renewables (with EDPR and hydro operations), EDP has an integrated utility presence in Portugal, Spain, and Brazil including electricity networks, client solutions, and energy management. EDP - EDPR's main shareholder - has been listed on the Dow Jones Sustainability Index for 14 consecutive years, recently being named the most sustainable electricity company on the Index.

Marathon Wind Farm would consist of **state-of-the-art** wind turbines.

Power generated at Marathon Wind Farm would **strengthen the Wisconsin electric grid**.

Marathon Wind Farm would **provide to the national energy security** for the state of Wisconsin and the United States, helping diversify domestic supply.

Wind is the largest source of renewable electricity generation in the United States, **providing 10.1% of the country's electricity**.⁶

¹Power generation calculated using a 35% capacity factor for wind based on 2019 AWEA Wind Powers America Annual Report. Household consumption based on the 2021 EIA Household Data monthly average consumption by state.

²Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgownayni, 2016.

³Assumes the average cost of an installed wind farm is \$1.4 million/MW for projects built after 2018. Based on U.S. DOE 2018 Wind Technologies Market Report.

⁴Includes vendor spending, property taxes, landowner payments and wages from site jobs.

⁵Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.
